

OSCAR LEUNG

Davis, CA 95618 | (510) 759-0000 | oscarleung1@gmail.com | [linkedin.com/in/oscar-leung](https://www.linkedin.com/in/oscar-leung) | github.com/oscar-leung

SUMMARY

QA Engineer bridging traditional test automation and AI/LLM quality evaluation. Experience spans aerospace systems at Maxar, state government platforms, and hands-on evaluation of AI-generated code and model outputs — designing test coverage and applying structured rubrics to assess correctness, safety, and reliability across conventional and AI systems.

SKILLS

AI / LLM Evaluation: Model Output Evaluation, Rubric-Based Scoring, PR Validity & Difficulty Assessment, Code Preference-Ranking, Agent & RAG Evaluation

Test Automation & QA: Test Automation Frameworks, Page Object Model, Regression / Smoke / Exploratory Testing, Test Case Design, Test Strategy, API Testing, Cross-Browser Testing, Bug Tracking

Languages & Automation Tools: Python, JavaScript/TypeScript, Java, Selenium WebDriver, Playwright, Cypress, pytest, JUnit, Espresso

CI/CD, Cloud & DevOps: Jenkins, TeamCity, GitHub Actions, Agile/Scrum, Code Review, Google Cloud Platform, AWS, Docker

Databases & Tools: MongoDB, MySQL, JIRA, TestRail, Postman, Git/GitHub, Salesforce CRM, Loggly

EXPERIENCE

AI Model Evaluator & Annotator, Handshake AI

11/2025 – Present

Remote

- Evaluate pull request validity and difficulty for AI-generated code changes (Project Helix), including developing golden solutions and writing fail-to-pass test cases to validate model outputs against ground truth
- Apply structured code evaluation and preference-ranking criteria to compare AI model outputs (Project Vox), directly leveraging SDET-honed test-validation judgment
- Conduct model response evaluation across text, image, and audio modalities (Project Hedgehog), applying consistent rubric-based scoring to assess output quality and correctness

Software QA Engineer, State of Illinois

04/2024 – 09/2024

Remote, IL

- Developed and maintained two Salesforce test automation projects using Python and Selenium, reducing manual testing time by 40%
- Designed and automated 300+ test cases with comprehensive coverage, improving testing efficiency and accelerating project delivery timelines

Maxar Technologies – Spacecraft Systems Integration and Test Development Engineer

03/2023 – 11/2023

San Jose, CA · promoted from Software Quality Engineer below

- Developed and tested 50+ camera control scripts for satellite imaging systems, achieving 100% requirement compliance and reducing manual testing cycles by 60%
- Deployed and validated scripts across dynamic space simulators and live satellite systems, proactively resolving 40+ critical bugs before launch; modernized TCL automation libraries from heritage to 1300-series programs, improving maintainability and execution speed by 35%

Maxar Technologies – Software Quality Engineer

03/2022 – 02/2023

San Jose, CA

- Spearheaded Jama and Jira integration project supporting Space Satellite Programs, including the Power and Propulsion Element (PPE), establishing quality control infrastructure for mission-critical systems
- Managed QA system ensuring requirements, design, and code quality compliance through NASA Procedural Requirements, the Software Engineering Handbook, and CMMI standards
- Automated requirements traceability reporting and completed software assurance audits across teams, reducing audit prep time from 2 weeks to 2 days

Quality Assurance Engineer, Location Labs (Avast)

06/2019 – 11/2019

Emeryville, CA

- Contributed to 4 major app releases — processing 500+ Jira tickets, filing 200+ bugs, and verifying 330 bugs and 80 user stories — strengthening the AT&T partnership
- Built feature test strategies and maintained 100+ test cases in TestRail; updated the Espresso automation framework to match evolving Android UI; performed SQL-based crash analytics in Amplitude

PROJECTS

QA Automation Portfolio — github.com/oscar-leung/playwright-qa-portfolio

08/2026

- 26-test Playwright/TypeScript suite (Page Object Model, session-reuse auth, UI + API tests) with GitHub Actions CI and HTML reporting

LinkedIn Job Lead Automation — github.com/oscar-leung/LinkedIn-Email-Scraper

01/2026

- Python/Selenium scraper extracting recruiter emails & job URLs from 10K+ LinkedIn posts in ~5 hours via regex parsing

EDUCATION & CERTIFICATIONS

San Jose State University — B.S. Computer Science, Minor in Japanese

2018

Google Cloud Platform — Architecting with Google Compute Engine Specialization
