

OSCAR LEUNG

Software QA Automation Engineer · SDET · AI Trainer

Davis, CA | (510) 759-0000 | oscarleung1@gmail.com | linkedin.com/in/oscar-leung | github.com/oscar-leung | oscar-leung.github.io

PROFESSIONAL SUMMARY

Software QA Automation Engineer with **5+ years** building production test frameworks across aerospace, government, and consumer mobile — now advancing frontier AI model development as a Handshake AI Fellow. Fluent across the full software development life cycle: architecting automated suites in Python and Selenium, modernizing TCL automation for satellite imaging programs, and applying QA rigor to large language model evaluation. Google Cloud certified, B.S. Computer Science, San José State University. Recognized for cross-functional collaboration, measurable quality gains, and adaptability across technical, customer-facing, and education roles.

CORE SKILLS

QA & Test Automation: Selenium, Playwright, pytest, JUnit, TestNG, Espresso, Appium, Cypress, JMeter; Test Strategy & Planning, Manual & Exploratory, Regression / Smoke, System Integration Testing, API Testing, Root Cause Analysis; TestRail, Azure DevOps, Jira, Copado

Languages & Frameworks: Python, Java, JavaScript, C++, C#, PHP, SQL, HTML/CSS, React.js, React Native, TCL

Tools & Platforms: Git, GitHub, GitHub Actions, Jenkins, TeamCity, Docker, CI/CD, Postman, Salesforce CRM, Amplitude, MongoDB, MySQL, JDBC, Bubble.io, VS Code, Android Studio, Google Cloud Platform

AI / Model Evaluation: LLM Evaluation, Prompt Engineering, RLHF Feedback, Adversarial Red-teaming, Data Annotation, Multi-modal Evaluation, Model Validation

Operating Systems: Windows, macOS, Linux / Ubuntu

Professional: Agile / Scrum, SDLC, Cross-functional Collaboration, B2B Sales & Account Management, Mentoring, Technical Documentation

PROFESSIONAL EXPERIENCE

Instructional Aide, Special Education (Specialized)

Jan 2026 – Present

Cupertino Union School District · Cupertino, CA · Part-time

- Guide K–5 students with **Individualized Education Programs (IEPs)** at a top-rated California district, providing behavioral and academic support in structured classrooms.
- Execute behavior intervention plans for **5–10 students daily**, cutting classroom disruptions ~30% via consistent crisis de-escalation.
- Partner with lead teachers and IEP teams to track progress and adjust strategies, lifting goal-attainment across the caseload.
- Teach small-group literacy and math aligned to IEP objectives, driving measurable growth for students with diverse needs.

Instructional Assistant, General Education

Apr 2025 – Present

Cupertino Union School District · Cupertino, CA · Part-time

- Reinforce classroom instruction for **K–5 students** under credentialed teachers across multiple district school sites.
- Run small-group reading and writing instruction and assist with physical education and activity-based learning.
- Supervise students through lessons, transitions, and activities, maintaining a safe and focused learning environment.

AI Trainer, Fellowship — Software Engineering & Multi-Modal Evaluations

Nov 2025 – Present

Handshake AI · Remote · Freelance

- Advance frontier-model development through the Handshake AI Fellowship, partnering with leading AI labs to train, evaluate, and red-team large language and multi-modal models — **\$12,900+ in contributor earnings** across 10+ concurrent projects, peaking at 80+ hrs/week and 177 tasks in a single week.
- Project Ivy** (Offline Evaluations & Online Ranking): benchmark agentic LLM performance across realistic multi-step tasks with structured rubric grading, running blind side-by-side comparisons that inform RLHF training signals.
- Project Helix:** dissect production codebases and screen GitHub pull requests to isolate training data for code-reasoning models.
- Project Amber:** conduct multi-modal red-teaming of an image model, designing adversarial prompts that surface failure modes across visual reasoning, safety, and alignment.
- Projects Hedgehog, Voyager, Lexicon & Horizon:** raise model accuracy across audio, visual, and text modalities, authoring adversarial question-answer pairs and capturing on-camera professional workflows to expand multi-modal training corpora.
- Earned the **Model Validation 2 — Expert** credential (Handshake, Dec 2025).

Account Executive

Feb 2026 – Mar 2026

RYSE (Bay Area) · Bay Area, CA · On-site · Full-time

- Drove B2B growth by identifying and acquiring new business accounts across the Bay Area, presenting Amazon Business solutions that streamlined procurement and reduced client costs.
- Prospected in-territory at **30–70+ business visits per day**, engaging decision-makers through consultative selling.
- Ran the full sales cycle from cold outreach through account setup and onboarding while building a sustainable pipeline.

AI Data Annotation Specialist

Nov 2025 – Dec 2025

Outlier · Remote · Freelance

- Scored and compared AI-generated responses, supplying structured feedback that improved large language model outputs.

- Authored and annotated AI training data, applying prompt-engineering and quality-review practices across diverse task categories.

Full Stack Developer (Internship)

Nov 2024 – Jan 2025

Dabba Eats • Michigan, US • Remote • Internship

- Contributed frontend and no-code development for a Michigan food-delivery startup building a mobile-first ordering platform.
- Shipped **3+ responsive UI components** in React.js and React Native, smoothing page-load inconsistencies across iOS and Android.
- Automated order-management logic through Bubble.io workflows, cutting manual admin tasks an estimated 25%.
- Upheld clean Git version-control practices across a cross-functional remote team, speeding code reviews and deployments.

Software QA Automation Engineer (Contract)

Apr 2024 – Sep 2024

TeQuity Partners → Illinois Dept. of Innovation & Technology (DoIT) • Remote • Contract

- Embedded as QA engineer via TeQuity Partners supporting the Illinois Department of Innovation & Technology on enterprise-scale digital-transformation initiatives across state government systems.
- Engineered and sustained two Salesforce automation projects in Python and Selenium, cutting manual testing time **40%**.
- Designed and automated **300+ test cases** across Azure DevOps, improving efficiency and accelerating the project-delivery timeline.
- Assembled test plans and regression suites in Azure DevOps and Copado, trimming regression cycle time an estimated 20%.
- Directed test-case design with developers and project managers to triage defects and hold release milestones across sprints.

Spacecraft Systems Integration & Test Development Engineer

Mar 2023 – Nov 2023

Maxar Technologies • Palo Alto, CA • Full-time

- Promoted to a systems-level role at a global leader in space infrastructure, covering spacecraft integration and test automation.
- Authored and validated **50+ camera-control scripts** for satellite imaging systems, achieving 100% requirement compliance and cutting manual testing cycles 60%.
- Modernized TCL automated test scripts for spacecraft subsystem validation, porting heritage libraries to **1300-series space programs** and lifting execution speed ~35%.
- Integrated JDBC pipelines validating telemetry databases, enabling real-time defect detection during systems integration testing (SIT).
- Deployed scripts across dynamic space simulators and live satellite systems, resolving **40+ critical defects** ahead of launch milestones.

Junior Software Quality Engineer

Mar 2022 – Mar 2023

Maxar Technologies • San Jose, CA • Full-time

- Codified and enforced software-quality standards across the SDLC, running IT audits and reviews that cut post-release defect rates ~**25%**.
- Traced recurring defects to root cause (RCA), driving corrective actions that raised process-compliance scores across teams.
- Curated quality-audit documentation and Git version-control workflows for **10+ engineers** across simultaneous releases.

Recreation Lead

Aug 2020 – Aug 2021

City of Alameda — Recreation & Parks Department • Alameda County, CA • Part-time

- Planned and ran recreation programs for K-12 youth spanning sports, crafts, cooking, dance, drama, city-wide events, and excursions.
- Modeled activities and enforced safety procedures, keeping a positive, well-managed program environment.

Quality Assurance Engineer I

Jun 2019 – Nov 2019

Location Labs by Avast • Emeryville, CA • Contract

- Anchored QA across **4 concurrent app versions** of a family-safety and mobile-security suite shipped through carriers including AT&T.
- Triageed **500+ Jira tickets**, filed 200+ bugs, and verified 330+ bugs and 80 user stories, strengthening the AT&T carrier relationship.
- Owned end-to-end test strategy and **100+ TestRail cases**, updating the Espresso automation framework against evolving Android UI.
- Probed crashes via SQL analytics in Amplitude, ran exploratory and regression testing, and mentored teammates on product and tools.

Case Manager, Access Solutions

Nov 2018 – Jan 2019

Genentech • South San Francisco, CA • Contract

- Bridged patients, providers, distributors, and insurance carriers so services were delivered in the least restrictive, least costly manner and patients could start or stay on therapy.
- Provided customer-focused reimbursement support to patients, pharmacists, physicians, and the internal sales force.
- Cleared **11+ tasks per hour and 2,500+ tasks** during peak season, placing 100+ outbound calls while consistently exceeding expectations.

Checker (Cashier)

Sep 2018 – Nov 2018

Safeway • United States • Part-time

- Operated a computerized register to itemize and total purchases, scanning **20+ items per minute** and bagging above expected throughput.

Commissary Student Worker

Aug 2017 – May 2018

San José State University • San Jose, CA • Part-time

- Fulfilled campus dining and catering orders with the team, consistently accurate and ahead of deadline.

Graduate & Extended Studies (GES) Student Assistant

Mar 2016 – Aug 2017

San José State University • San Jose, CA • Part-time

- Recruited **50+ students** into master's programs while maintaining prospective-student records in Salesforce.
- Fielded inbound and outbound calls with prospective graduate students and organized office documentation for staff and faculty.

- Coordinated monthly symposium events for guest speakers from across Silicon Valley.
- Produced videos with the Industrial Design department for its website and maintained classroom equipment, including touchscreen tablets and faculty microphones.

SELECTED PROJECTS

Full portfolio with live demos and source: oscar-leung.github.io

Playwright E2E + API Test Automation Suite (SauceDemo) github.com/oscar-leung/playwright-qa-portfolio

Playwright · TypeScript · GitHub Actions · Page Object Model · API Testing

26-test UI + API suite and modern counterpart to the Selenium suite below: Page Object Model, one-time login with storageState session reuse, a real UI defect documented as an expected failure via test.fail(), and GitHub Actions CI on every push.

Job Hunt Automation Suite

Python · Selenium · Google Sheets API · PythonAnywhere · Headless Chrome

Production-grade platform sourcing and processing **1,000+ job listings per headless run** across LinkedIn, Greenhouse, and Indeed. Built with anti-detection pacing, URL-fingerprint deduplication, a modular per-platform architecture, and real-time Google Sheets dashboard sync — deployed to run autonomously 24/7 in the cloud.

Salesforce CRM Test Automation Framework

Java · Selenium · TestNG · Page Object Model

Java and Selenium automation framework built against Salesforce CRM from scratch on the Page Object Model, with a TestNG runner and a regression suite covering core CRM workflows.

End-to-End QA Suite (SauceDemo)

Python · Selenium · pytest · Page Object Model

End-to-end suite covering login, cart, and checkout flows for an e-commerce web application, featuring data-driven parametrization and HTML failure reports with screenshots.

Gatsby Cloud CMS Deployments

Gatsby · Headless CMS · CI/CD

Production websites deployed with Gatsby Cloud integrated against multiple headless CMS platforms (Cosmic, DatoCMS, Contentful), demonstrating full-stack development and deployment-pipeline experience.

EDUCATION & TRAINING

San José State University

2014 – 2018

Bachelor of Science in Computer Science — Minor in Japanese · Degree conferred August 2018

Relevant coursework: Data Structures & Algorithms · Object-Oriented Design · Software Engineering · Operating Systems · Computer Architecture · Database Management Systems · Compiler Design · Formal Languages & Computability · Artificial Intelligence · Information Security · Programming Paradigms · Computer Systems · Computer Game Design & Game Studies · Discrete Mathematics · Linear Algebra · Computers, Ethics & Society

Interview Kickstart

2023 – 2024

Level Up — Test Engineering Program

Code Tenderloin — Job Readiness Program

2023 – 2024

Career-readiness and professional-development training · San Francisco, CA

Mission Techies — Mission Economic Development Agency (MEDA)

2022

Tuition-free IT support and software-development training program · San Francisco, CA

Alameda High School

2010 – 2014

High School Diploma

LICENSES & CERTIFICATIONS

- **Succeeding as a First-Time Tech Manager** — LinkedIn Learning · May 2026
- **Model Validation 2 — Expert** — Handshake · Dec 2025
- **Information Technology Specialist I (ITS I) Civil Service Exam** — scored 95%, State of California · eligible through April 2027
- **Goal Setting: Objectives and Key Results (OKRs)** — LinkedIn · Oct 2022
- **Architecting with Google Compute Engine** — Coursera (Google Cloud) · Jun 2020
- **Google Cloud Infrastructure Specialization** — 5-course series, Coursera (Google Cloud) · Jun 2020 — Foundation, Core Services, Scaling & Automation, Design & Process, GCP Fundamentals: Core Infrastructure
- **ServSafe Food Handler** — ServSafe · Aug 2017 (expired 2020)

LANGUAGES

Cantonese, Japanese, and Spanish — elementary proficiency.
