

OSCAR LEUNG

Software QA Automation Engineer | SDET | AI Trainer

Davis, CA | (510) 759-0000 | oscarleung1@gmail.com
[linkedin.com/in/oscar-leung](https://www.linkedin.com/in/oscar-leung) | github.com/oscar-leung | oscar-leung.github.io

PROFESSIONAL SUMMARY

Software QA Automation Engineer with 5+ years building production test frameworks across aerospace, government, and consumer mobile — now also contributing to frontier AI model development as a Handshake AI Fellow. Experienced across the full software development life cycle: designing automated test suites in Python and Selenium, modernizing TCL automation for satellite imaging programs, and applying QA rigor to large language model evaluation. Google Cloud certified, with a B.S. in Computer Science from San José State University. Known for strong cross-functional collaboration, measurable quality improvements, and adaptability across technical, customer-facing, and education roles.

CORE SKILLS

QA & Test Automation: Selenium, Playwright, pytest, JUnit, TestNG, Espresso, Appium, WebDriver, Cypress, JMeter; Test Strategy & Planning, Manual & Exploratory Testing, Regression / Smoke Testing, System Integration Testing, API Testing, Root Cause Analysis; TestRail, Azure DevOps, Jira, Copado

Languages & Frameworks: Python, Java, JavaScript, C++, C#, PHP, SQL, HTML/CSS, React.js, React Native, TCL

Tools & Platforms: Git, GitHub, GitHub Actions, Jenkins, TeamCity, Docker, CI/CD, Postman, Salesforce CRM, Amplitude, MongoDB, MySQL, JDBC, Bubble.io, VS Code, Android Studio, Google Cloud Platform

AI / Model Evaluation: LLM Evaluation, Prompt Engineering, RLHF Feedback, Adversarial / Red-team Prompting, Data Annotation, Multi-modal Evaluation, Model Validation

Operating Systems: Windows, macOS, Linux / Ubuntu

Professional: Agile / Scrum, SDLC, Cross-functional Collaboration, B2B Sales & Account Management, Mentoring, Technical Documentation

PROFESSIONAL EXPERIENCE

Instructional Aide, Special Education (Specialized)

Jan 2026 – Present

Cupertino Union School District · Cupertino, CA · Part-time

- Support K–5 students with Individualized Education Programs (IEPs) at one of California's top-rated school districts, providing behavioral and academic support in structured classroom environments.
- Implement behavior intervention plans for 5–10 students daily, reducing classroom disruptions by an estimated 30% through consistent crisis de-escalation techniques.
- Collaborate with lead teachers and IEP teams to track student progress and adjust support strategies, improving goal-attainment rates across the assigned caseload.
- Deliver small-group instruction in literacy and math aligned to IEP objectives, contributing to measurable academic growth for students with diverse learning needs.

Instructional Assistant, General Education

Apr 2025 – Present

Cupertino Union School District · Cupertino, CA · Part-time

- Support classroom instruction for elementary students from kindergarten through 5th grade under the direction of credentialed teachers across multiple district school sites.
- Deliver small-group instruction in reading and writing and assist with physical education and activity-based learning.
- Supervise students during lessons, transitions, and activities to maintain a safe, focused, and positive learning environment.

AI Trainer, Fellowship — Software Engineering & Multi-Modal Evaluations

Nov 2025 – Present

Handshake AI · Remote · Freelance

- Contribute to frontier-model development through the Handshake AI Fellowship, partnering with leading AI labs to train, evaluate, and red-team large language and multi-modal models; earned \$12,900+ in contributor earnings across 10+ concurrent projects, sustaining 80+ hrs/week at peak (177 tasks completed in a single week).
- Project Ivy (Offline Evaluations & Online Ranking): benchmark agentic LLM performance through realistic multi-step tasks and structured rubric grading, performing blind side-by-side model comparisons to inform RLHF training signals.
- Project Helix: analyze and refine complex production codebases and screen large GitHub pull requests to identify high-quality training data for code-reasoning models.
- Project Amber: conduct multi-modal red-teaming of an image model — designing adversarial prompts and surfacing failure modes across visual reasoning, safety, and alignment.
- Projects Hedgehog, Voyager, Lexicon & Horizon: improve model accuracy across audio, visual, and text modalities, author adversarial question-answer pairs, and capture on-camera professional workflows to expand multi-modal training corpora.
- Earned the Model Validation 2 — Expert credential (Handshake, Dec 2025).

Account Executive

Feb 2026 – Mar 2026

RYSE (Bay Area) · Bay Area, CA · On-site · Full-time

- Drove B2B sales growth by identifying and acquiring new business accounts across the Bay Area, presenting Amazon Business solutions to help companies streamline procurement and reduce costs.
- Conducted daily field prospecting and territory canvassing — 30–70+ business visits per day — engaging decision-makers through consultative selling.
- Managed the full sales cycle from cold outreach to account setup and onboarding while building a sustainable pipeline.

AI Data Annotation Specialist

Nov 2025 – Dec 2025

Outlier · Remote · Freelance

- Evaluated and compared AI-generated responses, providing structured feedback used to improve large language model outputs.
- Created and annotated AI training data, applying prompt-engineering and quality-review practices across diverse task categories.

Full Stack Developer (Internship)

Nov 2024 – Jan 2025

DABBA EATS · Michigan, US · Remote · Internship

- Contributed to frontend and no-code development for a Michigan-based food-delivery startup building a mobile-first ordering platform.
- Developed and shipped 3+ responsive UI components using React.js and React Native, reducing page-load inconsistencies across iOS and Android.
- Built and iterated on Bubble.io workflows to automate order-management logic, cutting manual admin tasks by an estimated 25%.
- Maintained clean Git version-control practices across a cross-functional remote team, enabling faster code reviews and smoother deployments.

Software QA Automation Engineer (Contract)

Apr 2024 – Sep 2024

TeQuity Partners → Illinois Dept. of Innovation & Technology (DoIT) · Remote · Contract

- Embedded QA engineer placed by TeQuity Partners to support the Illinois Department of Innovation & Technology (DoIT) on enterprise-scale digital-transformation initiatives across state government systems.
- Developed and maintained two Salesforce automation projects using Python and Selenium, reducing manual testing time by 40%.
- Designed and automated 300+ test cases across Azure DevOps, improving testing efficiency and accelerating the project-delivery timeline.

- Built and maintained test plans and regression suites using Azure DevOps and Copado, reducing regression cycle time by an estimated 20%.
- Led test-case design and collaborated with cross-functional developers and project managers to triage defects and ensure on-time release milestones across multiple sprint cycles.

Spacecraft Systems Integration & Test Development Engineer

Mar 2023 – Nov 2023

Maxar Technologies · Palo Alto, CA · Full-time

- Promoted into a systems-level role at Maxar, a global leader in space infrastructure and Earth intelligence, focused on spacecraft integration and test automation.
- Developed and tested 50+ camera-control scripts for satellite imaging systems, achieving 100% requirement compliance and reducing manual testing cycles by 60%.
- Built and maintained TCL-based automated test scripts for spacecraft subsystem validation, modernizing automation libraries from heritage to 1300-series space programs and improving execution speed by ~35%.
- Integrated test-data pipelines using JDBC to query and validate telemetry databases, enabling real-time defect detection during spacecraft systems integration testing (SIT).
- Deployed and validated scripts across dynamic space simulators and live satellite systems, identifying and resolving 40+ critical defects prior to launch milestones.

Junior Software Quality Engineer

Mar 2022 – Mar 2023

Maxar Technologies · San Jose, CA · Full-time

- Authored and enforced software-quality standards across the SDLC, conducting IT audits and process reviews that reduced post-release defect rates by an estimated 25%.
- Performed root-cause analysis (RCA) on recurring software defects, driving corrective actions that improved process-compliance scores across development teams.
- Maintained quality-audit documentation and managed Git-based version-control workflows, supporting a team of 10+ engineers across multiple simultaneous release cycles.

Recreation Lead

Aug 2020 – Aug 2021

City of Alameda — Recreation & Parks Department · Alameda County, CA · Part-time

- Planned, organized, and conducted recreation programs for youth from kindergarten through high school — including sports, arts and crafts, cooking, dance, drama, city-wide special events, and excursions.
- Demonstrated activities and enforced safety procedures to maintain a positive, well-managed program environment.

Quality Assurance Engineer I

Jun 2019 – Nov 2019

Location Labs by Avast · Emeryville, CA · Contract

- Served as a core QA contributor across 4 concurrent app versions for Location Labs (acquired by Avast), which builds family-safety and mobile-security apps distributed through major carriers including AT&T.
- Managed 500+ Jira tickets, filed 200+ bugs, and verified 330+ bugs and 80 user stories across 4 app versions, improving product quality and strengthening the company's AT&T carrier relationship.
- Owned end-to-end feature test-strategy creation and maintained 100+ test cases in TestRail, while updating the Espresso automation framework to match evolving Android UI designs.
- Performed SQL-based data analytics in Amplitude to investigate app crashes, conducted daily exploratory and regression testing, and mentored QA team members on product knowledge and testing tools.

Case Manager, Access Solutions

Nov 2018 – Jan 2019

Genentech · South San Francisco, CA · Contract

- Served as a liaison between patients, providers, distributors, and insurance carriers to ensure services were provided in the least restrictive and least costly manner so patients could start or stay on therapy.
- Provided customer-focused reimbursement support to patients, pharmacists, physicians, and the internal sales force.
- Completed 11+ tasks per hour and 2,500+ tasks during the busiest season, making 100+ outbound calls while consistently exceeding expectations.

Checker (Cashier)

Sep 2018 – Nov 2018

Safeway · United States · Part-time

- Operated a computerized register to itemize and total customer purchases, accurately scanning 20+ items per minute and bagging groceries above the expected throughput.

Commissary Student Worker

Aug 2017 – May 2018

San José State University · San Jose, CA · Part-time

- Collaborated with team members to fulfill campus dining and catering orders accurately and consistently ahead of deadline.

Graduate & Extended Studies (GES) Student Assistant

Mar 2016 – Aug 2017

San José State University · San Jose, CA · Part-time

- Recruited 50+ students into master's programs while maintaining prospective-student records in Salesforce.
- Handled inbound and outbound calls with prospective graduate students and organized office documentation for staff and faculty.
- Coordinated monthly symposium events for guest speakers from across Silicon Valley.
- Partnered with the Industrial Design department to produce videos for the department website and maintained classroom equipment, including touchscreen tablets and microphones for faculty.

SELECTED PROJECTS

Full portfolio with live demos and source: oscar-leung.github.io

Playwright E2E + API Test Automation Suite (SauceDemo)

Playwright · TypeScript · GitHub Actions · Page Object Model · API Testing

26-test UI + API suite and modern counterpart to the Selenium suite below: Page Object Model, one-time login with storageState session reuse, a real UI defect documented as an expected failure via test.fail(), and GitHub Actions CI on every push. Source: github.com/oscar-leung/playwright-qa-portfolio

Job Hunt Automation Suite

Python · Selenium · Google Sheets API · PythonAnywhere · Headless Chrome

Production-grade automation platform that sources and processes 1,000+ job listings per headless run across LinkedIn, Greenhouse, and Indeed. Built with anti-detection pacing, URL-fingerprint deduplication, a modular per-platform architecture, and real-time Google Sheets dashboard sync — deployed to run autonomously 24/7 in the cloud.

Salesforce CRM Test Automation Framework

Java · Selenium · TestNG · Page Object Model

Built a Java and Selenium test-automation framework against Salesforce CRM from scratch using the Page Object Model, with a TestNG runner and a regression suite covering core CRM workflows.

End-to-End QA Suite (SauceDemo)

Python · Selenium · pytest · Page Object Model

End-to-end test suite covering login, cart, and checkout flows for an e-commerce web application, featuring data-driven parametrization and HTML failure reports with screenshots.

Gatsby Cloud CMS Deployments

Gatsby · Headless CMS · CI/CD

Deployed production websites with Gatsby Cloud integrated with multiple headless CMS platforms (Cosmic, DatoCMS, Contentful), demonstrating full-stack web development and deployment-pipeline experience.

EDUCATION & TRAINING

San José State University

2014 – 2018

Bachelor of Science in Computer Science — Minor in Japanese · Degree conferred August 2018

Relevant coursework: Data Structures & Algorithms · Object-Oriented Design · Software Engineering · Operating Systems · Computer Architecture · Database Management Systems · Compiler Design · Formal Languages & Computability · Artificial Intelligence · Information Security · Programming Paradigms · Computer Systems · Computer Game Design & Game Studies · Discrete Mathematics · Linear Algebra · Computers, Ethics & Society	
Interview Kickstart Level Up — Test Engineering Program	2023 – 2024
Code Tenderloin — Job Readiness Program Career-readiness and professional-development training · San Francisco, CA	2023 – 2024
Mission Techies — Mission Economic Development Agency (MEDA) Tuition-free IT support and software-development training program · San Francisco, CA	2022
Alameda High School High School Diploma	2010 – 2014

LICENSES & CERTIFICATIONS

• Succeeding as a First-Time Tech Manager — LinkedIn Learning	May 2026
• Model Validation 2 — Expert — Handshake	Dec 2025
• Information Technology Specialist I (ITS I) Civil Service Exam — scored 95% — State of California, eligible through April 2027	
• Goal Setting: Objectives and Key Results (OKRs) — LinkedIn	Oct 2022
• Architecting with Google Compute Engine — Coursera (Google Cloud)	Jun 2020
• Google Cloud Infrastructure Specialization — 5-course series — Coursera (Google Cloud) <i>Foundation · Core Services · Scaling & Automation · Design & Process · GCP Fundamentals: Core Infrastructure</i>	Jun 2020
• ServSafe Food Handler — ServSafe (issued 2017, expired 2020)	Aug 2017

LANGUAGES

Cantonese, Japanese, and Spanish — elementary proficiency.
